

Harvesters 688F

Challenge gravity with Eco Log 688E

The Eco Log 688F is an eight-wheeled harvester specially designed to minimize ground pressure when working in sensitive environments.

The powerful Volvo Penta engine, combined with versatility and flexibility, make the Eco Log 688F ideal for the toughest of jobs.

EXCELLENT VISIBILITY AND GREAT STABILITY

The driver cabin can be rotated a full 350 degrees, offering an almost unbeatable view of the work area. The Eco Log 688F also has a stable platform, providing great mobility and stability.

Some of the advantages of the Eco Log 688F:

- Specially designed for off-road work
- Minimizes ground pressure in sensitive environments
- Powerful Volvo Penta D8 engine
- Crane with powerful slewing torque
- High serviceability
- Stable platform

POWERFUL ENGINES

Eco Log harvesters are powered by Volvo Penta D8 engines, characterized by high performance, great reliability, impressive fuel efficiency, and low emissions.
